- The Generalizate, in a compaten to mobilize related a pull economic reservois, in extracting the following:
 - [4] coverembles of fuel.
 - (1) Hors efficient utilization of medication machiners,
 - (a) Mailroadion of labor to eliminate limit newsplayment, which exists despite a general abortage of nanyozer: and
 - (A) Avoldance of employment to non-predicative enterprises.
- 2. The PR has tried various means for estimilating industrial production. Morkers' councils and competitions were brought into operation with limited success. The "Stakhenov system" is being introduced new.
- 3. Strikes have been suppressed sutblessly by the police and finally outlawed by the EC II. Absentedire and tautiness, however, are still prevalent. Puring September 1967 an average of 40 thousand miners over absent daily out of a total of 145. Chousand employed. During the same veried absentees energy the 64 thousand steel murkers averaged eight thousand.
- 4. Increases in production and in the quantity of raw materials available have thrown more goods on the folish market and brought a nationable reduction in the price of some industrial products. Also helping to drive some prices downcard is the Government's obvious defurnination to respect the private enterprise. PCR's Charmont-wand storage were recertly ordered to lower prices.
- 5. There is a constant therings of milk, butter, and flour. During the first half of Fewender 1947 the sufferities prohibited cales of butter and milk in privately once afores. "Armats" milk, homey, coffee, the commutate, etc. have appeared on the market.
